Join us as a Geotechnical Engineer at Hart Crowser, Inc. in Seattle, Washington. You will be part of the team responsible for the geotechnical engineering of the world’s longest floating bridge, highest mechanically stabilized earth wall in the Western Hemisphere, world’s largest diameter soft-ground bored tunnel, and many of the tallest buildings in the Pacific Northwest. Headquartered in Seattle, you will be living in one of the most beautiful, vibrant, and fastest-growing cities in the country, working on commercial development, industrial development, transportation, infrastructure, and port/harbor projects.

The successful candidate for our Geotechnical Engineer position will possess an MS in Geotechnical Engineering and 0- to 5-years of experience. Engineer-in-Training license with ability to obtain Professional Engineer license in 3- to 4-years is desirable. Your daily responsibilities will include:

- Geotechnical engineering calculations and analyses;
- Seismic hazard evaluations – including 1D and 2D dynamic modeling, performance based seismic design with PSHA, and 3D numeric modeling;
- Geotechnical report writing;
- Geotechnical field exploration and sample collection;
- Geotechnical construction monitoring;
- Utilization of one of the most advanced geotechnical labs in the Pacific Northwest; and
- Participation in client meetings and presentations.

As a geotechnical engineer, you will bring your expertise and unique solutions to highly visible and challenging projects. Through our mentorship program and collaborative environment, we will empower you to grow your career in the direction that you want. Our mid-sized company allows entry-level candidates immediate heightened responsibilities, and an open-door policy encourages 1:1 access to some of the best and most experienced geotechnical leaders in the region.

This position involves fieldwork and some travel; while work will primarily be within the Pacific Northwest, the ability to travel and work in remote areas throughout the US, the Pacific Islands region and internationally is necessary. The ability to lift 50 lbs. and have a current drivers’ license with a good driving record is required.

Hart Crowser has a strong commitment to provide an environment that fosters creative thinking and opportunities for professional development. As an employee-owned company, each individual contributes to the success of the firm. As a condition of employment, the successful candidate must be able to provide documentation of eligibility to work in the US. Interested candidates are encouraged to submit their confidential cover letter and resume via our Career’s page at www.hartcrowser.com.
