USU AWWA Tour

11/01/2016

Members of the AWWA USU student charter at Franklin ID water facility.

Members of the AWWA USU student charter at Logan UT - UWRL.

The newly formed student chapter of the American Water Works Association (AWWA) recently went on tours of two water facilities. In early October, ten students attended a tour of the Utah Water Research Laboratory here at USU. The students enjoyed seeing applied research that is conducted at the lab. This week, the chapter also visited the Franklin Idaho Drinking Water Treatment Plant. This exposure to the industry has been a remarkable professional and academic experience for the Chapter.
